

EpiGaN named in the 2019 Global Cleantech 100 - out of 13,000 innovators from 90 countries

Hasselt, Belgium, January 28, 2019 - EpiGaN, a leading European supplier of Gallium Nitride (GaN) technology solutions for telecom (5G), power electronics, and sensor applications, was once again included by the Cleantech Group in their prestigious [2019 Global Cleantech 100](#).

EpiGaN, headquartered in Hasselt/Belgium, is a global provider of GaN-on-Si and GaN-on-SiC material product solutions for next-generation power switching, RF power, and advanced sensor systems. The Global Cleantech 100 serves as an annual guide to leading companies and themes in sustainable innovation. It features independent, for-profit companies best positioned to solve tomorrow's clean technology challenges. This year marks the 10th edition of the list.

"We at EpiGaN are delighted and honored with this nomination for the 2019 Global Cleantech 100," said Dr Marianne Germain, CEO and co-founder of EpiGaN nv. "It is another great reward for EpiGaN's highly committed team. Innovative GaN technology enables drastic energy savings, volume and weight reductions of power systems, miniaturization and significant cost reduction in areas where traditional Si solutions cannot meet current or future system requirements. EpiGaN offers unique and state-of-the-art solutions addressing the demanding mm-wave specifications for 5G cellular networks. EpiGaN's product portfolio also covers sensor applications. At our production facility in Hasselt (Belgium), we have developed unique GaN-on-Si and GaN-on-SiC wafer technologies up to 200mm on Si, and 150mm on SiC, which are more robust and offer differentiation to our global customer base. This year we are significantly scaling up our production capacity to meet the increasing demand of our customers for EpiGaN's state-of-the art GaN technology."

The Global Cleantech list combines the Group's research data with qualitative judgements from nominations of a global 87-member panel comprised of leading investors and experts from corporations, and industrialists active in technology and innovation scouting. From pioneers and veterans to new entrants, the panel represents the global cleantech community and results in a list with a powerful base of support from many important players within the cleantech ecosystem.

[The complete list of 100 companies](#) was revealed on 28 January at the 17th annual Cleantech Forum San Francisco.

About EpiGaN

Founded in 2010 EpiGaN, provides innovative GaN technology solutions to its global customer base. From its European headquarters and modern production site in Hasselt/Belgium the company offers early access to leading-edge GaN/Si and GaN/SiC epiwafer technology for next-generation power switching, RF power, and advanced sensor solutions. EpiGaN's GaN technology is a key enabler for device innovation in consumer power supplies, electric vehicles, wireless charging and RF power systems for next-generation cellular infrastructures – 5G, IoT (Internet of Things), and smart sensor

systems. The product spectrum ranges from application-specific standard epi-wafers of up to 200mm diameter to customized products utilizing the company's differentiating technology of AlN barrier and in-situ SiN passivation layers. For further information on EpiGaN nv, please visit our website at: www.epigan.com

About Cleantech Group

Cleantech® Group provides research, consulting and events to catalyze opportunities for sustainable growth powered by innovation. At every stage from initial strategy to final deals, we bring corporate change makers, investors, governments and stakeholders from across the ecosystem the access and customized support they need to thrive in a more digitized, de-carbonized and resource-efficient future. The company was established in 2002 and is headquartered in San Francisco with a growing international presence in London. Our parent company, [Enovation Partners](#), is based in Chicago.
